

How to Configure Facebook Login with MarketGrabber

1 Overview

This document describes how to configure Facebook Login with MarketGrabber. This feature allows people to register and login to your website using their Facebook account.

To setup your website to be able to use Facebook Login requires:

- **Facebook Account** - You must already have a Facebook Account. If you don't already have one, please go to www.facebook.com and create a Facebook account.
- **Facebook APP** – You must create a Facebook APP for your website. This document provides instructions on how to do that.
- **MarketGrabber Setup** – after your Facebook APP is created, your MarketGrabber site needs to be configured to communicate with Facebook. This document provides instructions on how to do that.

IMPORTANT NOTE: Facebook Login will not work if you are using your website with a temporary website address or IP address. Your domain name must be “live” and resolving to your website in order for Facebook login to work.

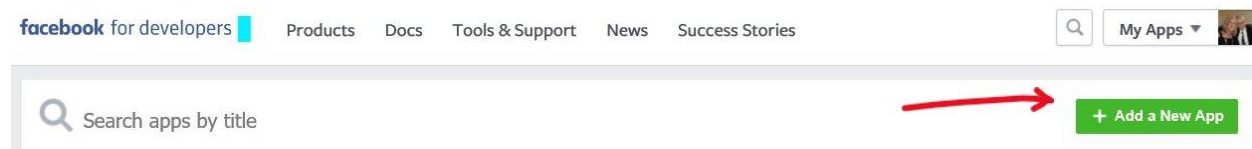

2 You Must Have a Facebook Account

Before you can complete this procedure, you must:

1. Have a Facebook Account
2. Be Logged into your Facebook Account (not your business page)

3 Create a Facebook APP for Your Website

Go to <http://developers.facebook.com> – the following Facebook page will appear:

Click on the Add a New App button.

The following screen will appear:

Create a New App ID
Get started integrating Facebook into your app or website

Display Name

Contact Email

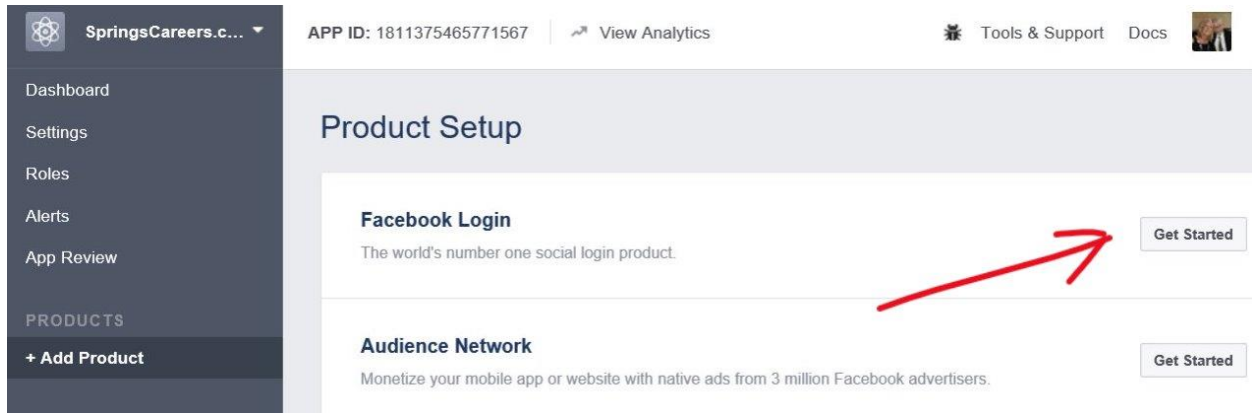

Category

By proceeding, you agree to the Facebook Platform Policies

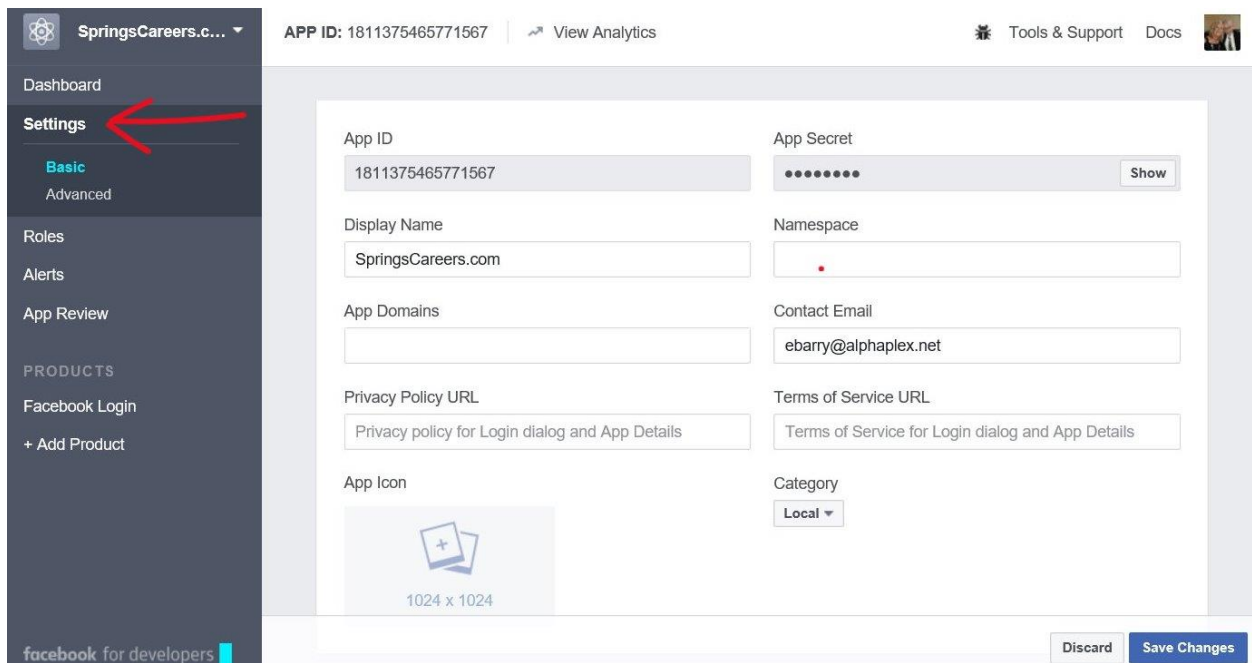

Enter the details shown above and press the Create App ID button.

How to Configure Facebook Login with MarketGrabber

Press the Get Started button to the right of the Facebook Login.

When the next screen appears do not enter or save anything – instead CLICK ON SETTINGS and then the following screen will appear:

How to Configure Facebook Login with MarketGrabber

In Namespace, enter your domain name without http:// and without www.
Enter your domain name in all lower case in App Domains as illustrated.

App ID: 733754746765233

App Secret: [Masked] Show

Display Name: SpringsCareers.com

Namespace: springscareerscom

App Domains: springscareers.com

Contact Email: ebarry@alphaplex.net

Privacy Policy URL: Privacy policy for Login dialog and App Details

Terms of Service URL: Terms of Service for Login dialog and App Details

App Icon: 1024 x 1024

Category: Local

+ Add Platform

Press the ADD PLATFORM Link – the following will appear:

Select Platform

Facebook Canvas Website iOS Android

Windows App Page Tab Xbox PlayStation

Cancel

Click on Website.

How to Configure Facebook Login with MarketGrabber

Then enter your website URL as illustrated below and press the save changes button.

The screenshot shows the Facebook App configuration interface. The top section contains fields for App ID (733754746765233), App Secret (masked with dots and a 'Show' button), Display Name (SpringsCareers.com), Namespace (springscareerscom), App Domains (springscareers.com), Contact Email (ebarry@alphaplex.net), Privacy Policy URL (Privacy policy for Login dialog and App Details), Terms of Service URL (Terms of Service for Login dialog and App Details), App Icon (1024 x 1024), and Category (Local). Below this is a 'Website' section with a 'Quick Start' button and a 'Site URL' field containing 'www.springscareers.com'. At the bottom right are 'Discard' and 'Save Changes' buttons.

Make the App Public (Make it Live). Click on the App Review link, then click on Yes to make it public.

The screenshot shows the Facebook App Review page. The top navigation bar includes 'SpringsCareers.c...', 'APP ID: 193219097784615', and 'View Analytics'. A sidebar on the left lists 'Dashboard', 'Settings', 'Roles', 'Alerts', 'App Review' (highlighted with a red arrow), and 'PRODUCTS' (Facebook Login, + Add Product). The main content area features a 'Make SpringsCareers.com public?' dialog with a 'No' button and a 'Yes' button (indicated by a red arrow). Below this is a 'Submit Items for Approval' section with a 'Start a Submission' button.

How to Configure Facebook Login with MarketGrabber

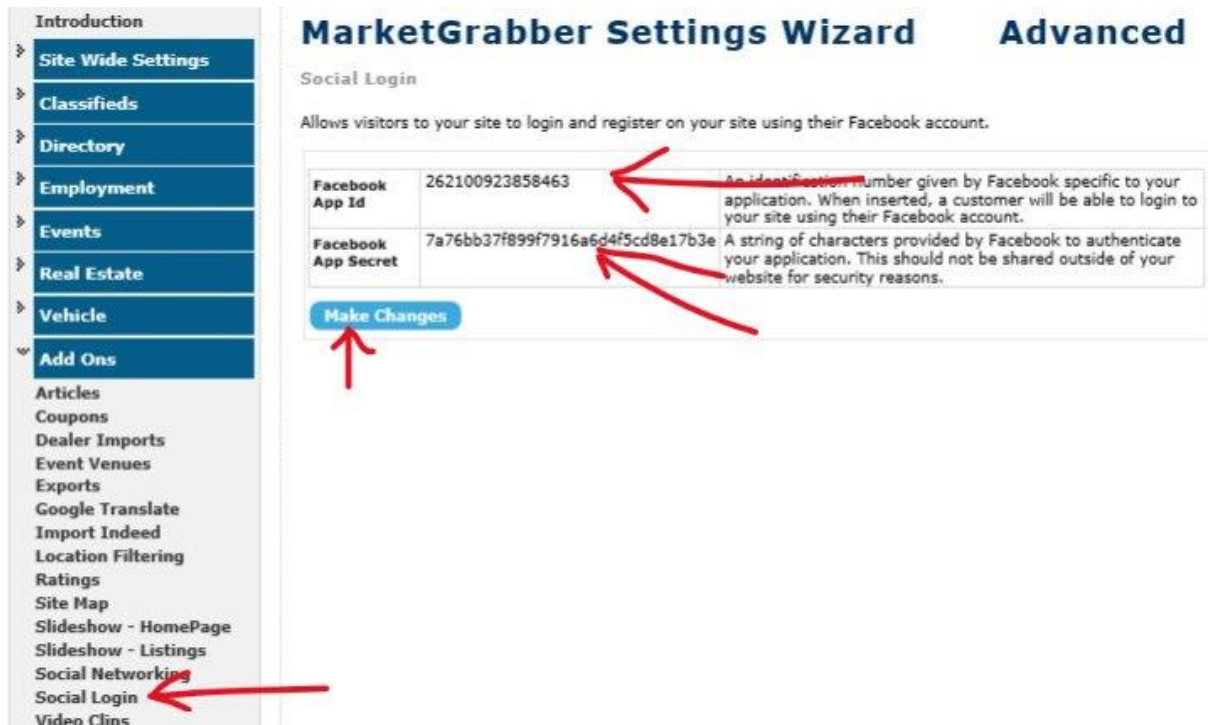

Now click on the Dashboard link and the following will appear:

COPY YOUR APP ID.
COPY YOUR APP SECRET.
You will need to enter these in your MarketGrabber site.

4 MarketGrabber Setup

Login to your MarketGrabber Back Office. Go to the Settings Wizard. In the Settings Wizard, click on Add Ons and then click on Social Login. Enter your **Facebook App Id** and **Facebook App Secret** as shown here:

MarketGrabber Setup is now completed. The Facebook Login button will automatically appear on your website.

How to Configure Facebook Login with MarketGrabber

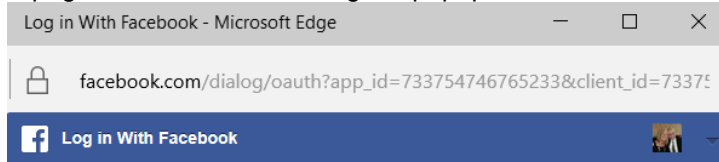

5 Testing Your Facebook Login Setup

Go to your website.

Go to the Login page (logout if you are already logged in).

Click on the Login with Facebook button that appears on the Login page.

A page similar to the following will popup from Facebook:

SpringCareers.com will receive:
your public profile and email address. ⓘ

[✎ Edit This](#)

[Continue as Edward](#)

[Cancel](#)

🔒 This doesn't let the app post to Facebook

Click on Login. You will now automatically be registered and logged in to your MarketGrabber website. Your Email Address, First Name and Last Name are automatically provided by Facebook and these values are stored in a customer record in your MarketGrabber database.

Problem Resolution – if Facebook Login is not working double check the following:

- Make sure you have created a Facebook App
- Make sure your app is approved for Facebook Login
- Make sure you are not using a temporary web address or IP address rather than a live domain name
- Make sure you have entered your Facebook App Id and Facebook Secret into your MarketGrabber site
